Erratum: Differences in Strength, Speed, and Power Performance Between Visually Impaired Paralympic and Olympic Sprinters

A phrase in the second paragraph in the Discussion section on the second page of the article was deleted in error. Thus the passage below, with the deleted phrase in italics, was changed to the one that follows it. The article was corrected March 11, 2022.

hence, the former is more likely to improve through resistance training. In support of this concept, a recent study with elite youth athletes reported a significant increase in maximum strength after a strength power–oriented training intervention
